The Rise of Artificial Intelligence in Financial Services

“Full Artificial Intelligence could spell the end of the human race”

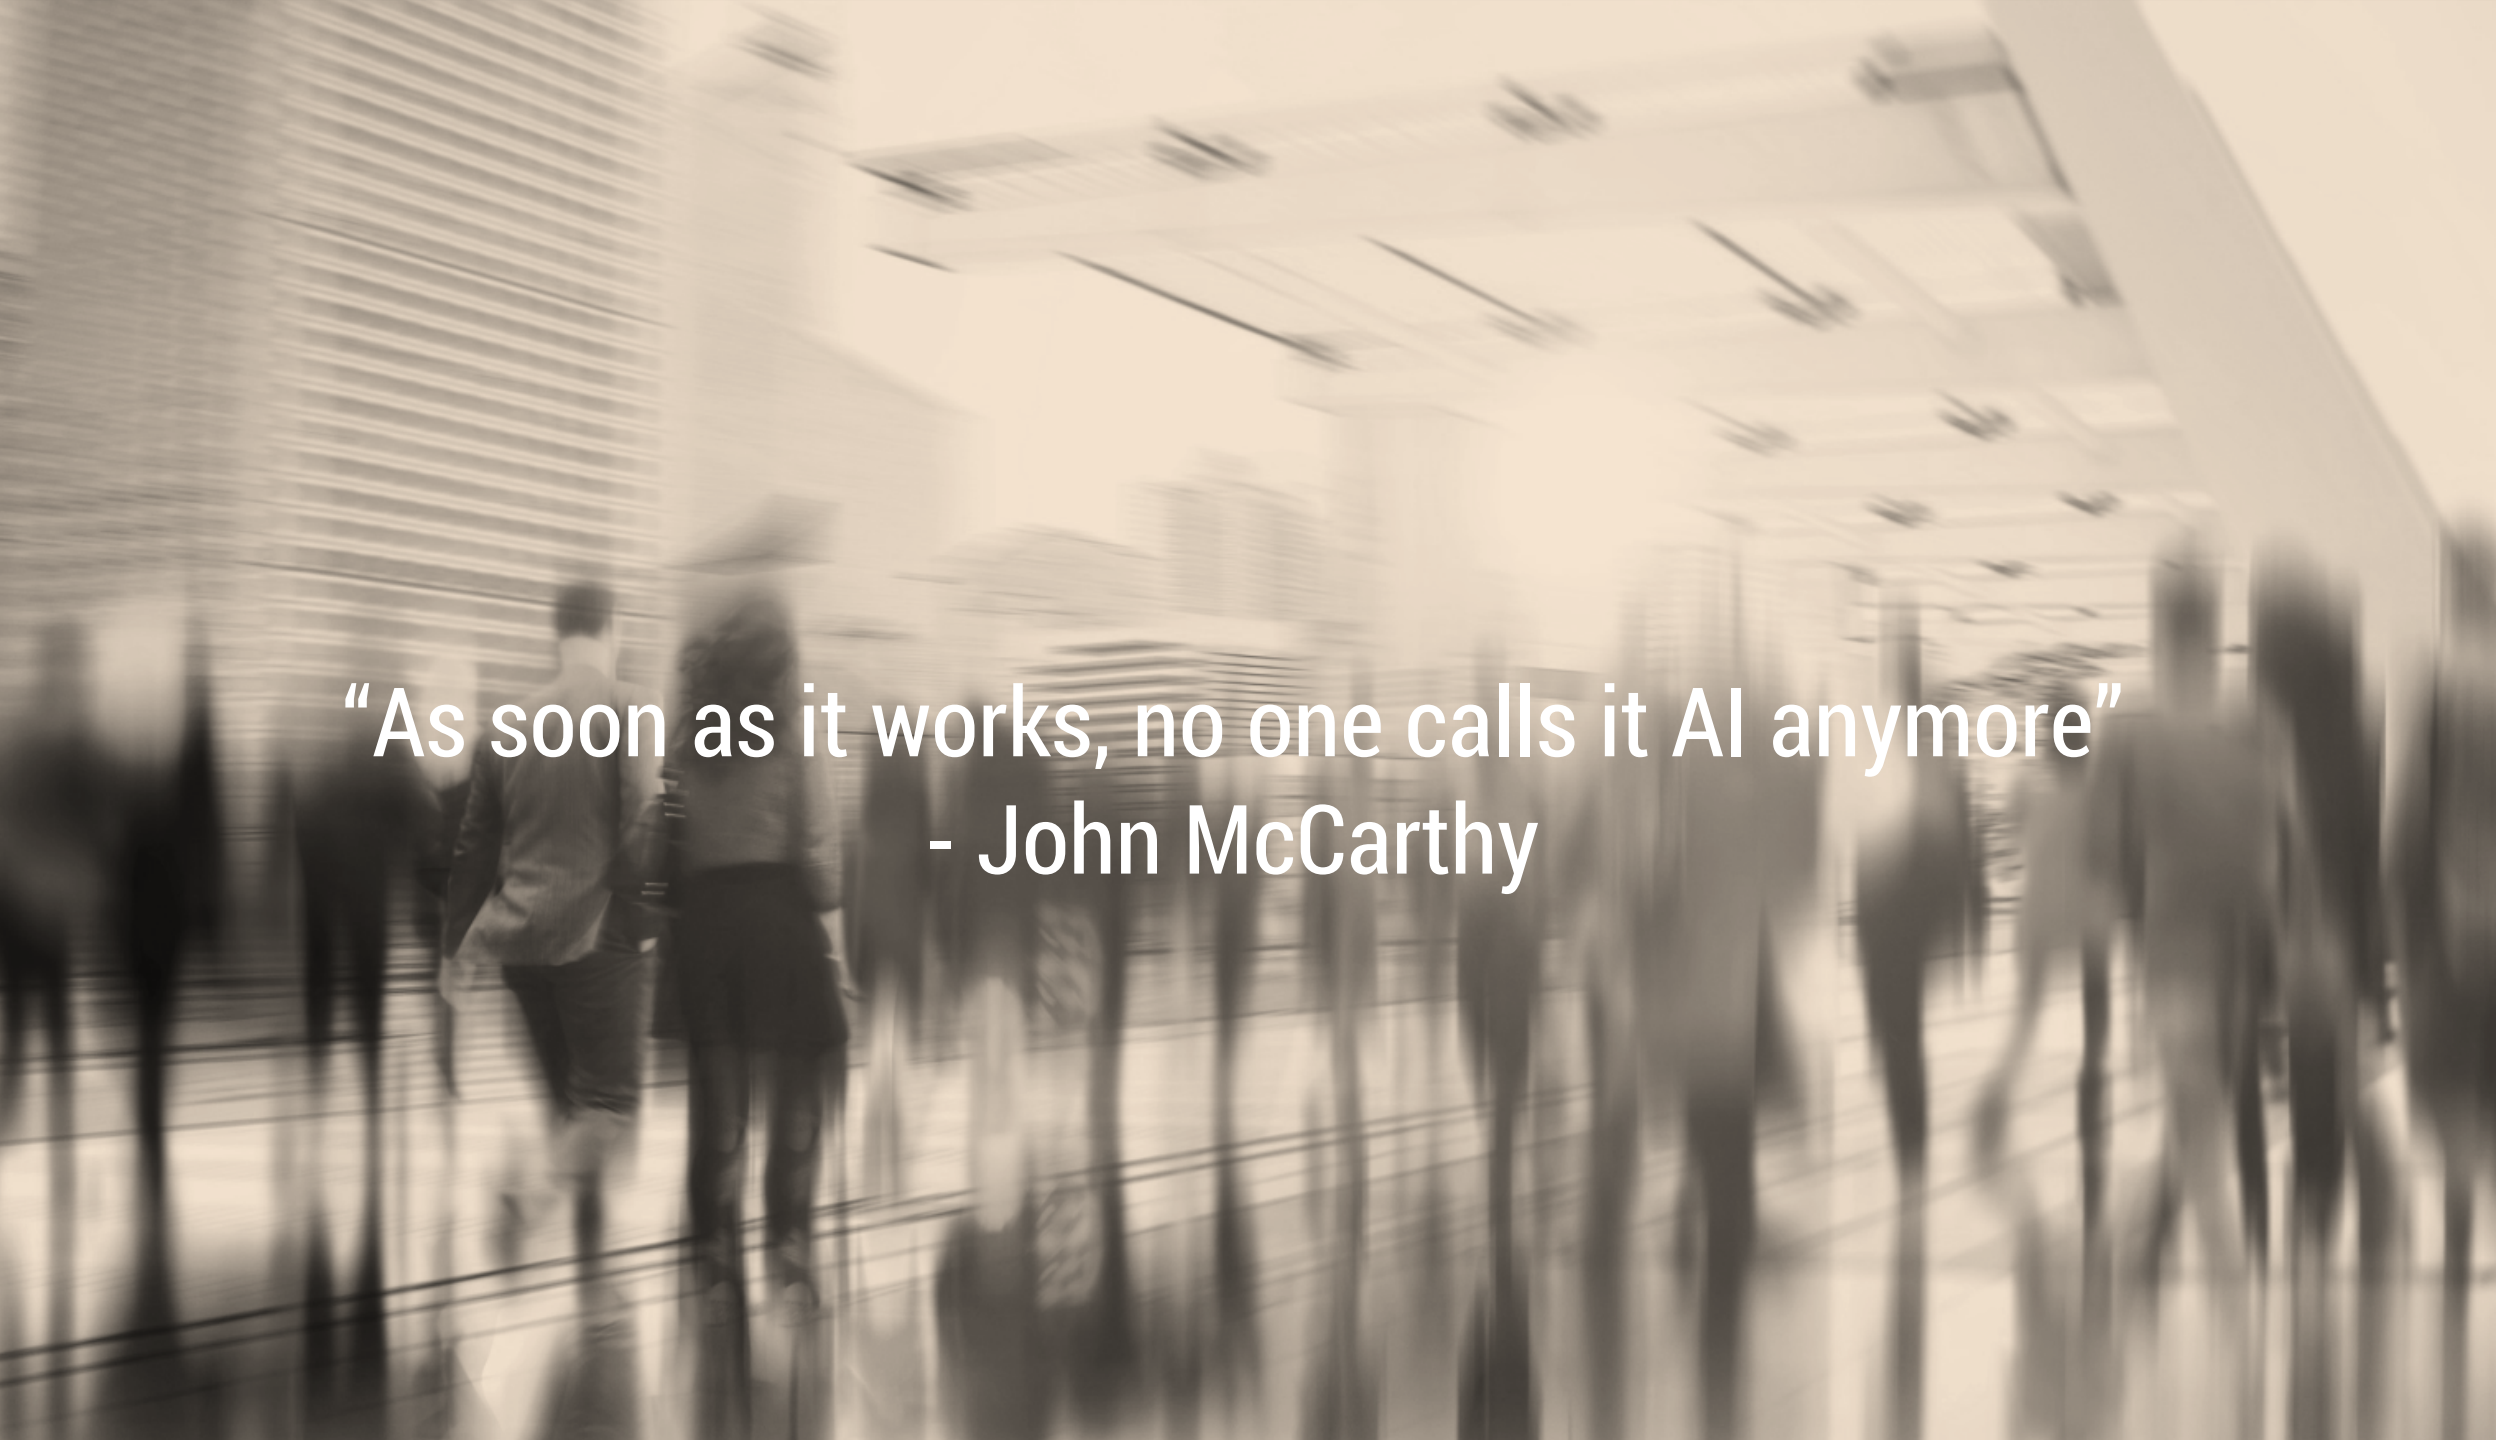

“With Artificial Intelligence we are summoning the demon”

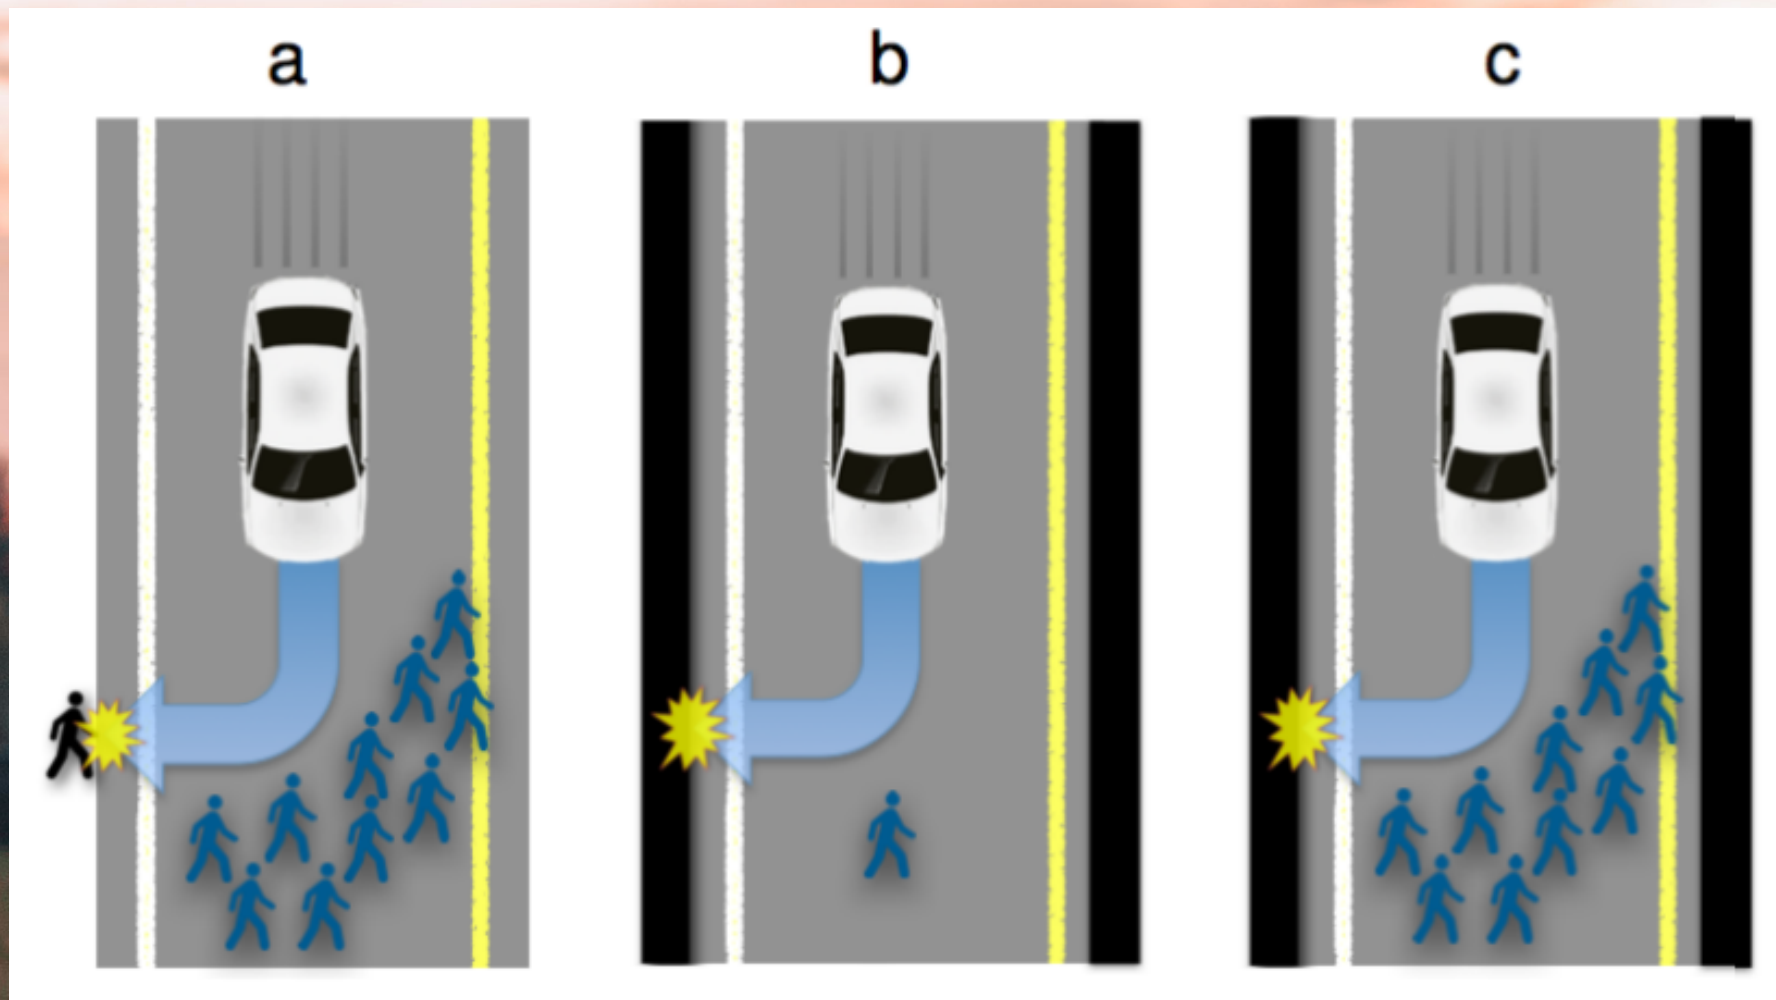

We are currently running a world on (narrow) AI

“As soon as it works, no one calls it AI anymore”
- John McCarthy

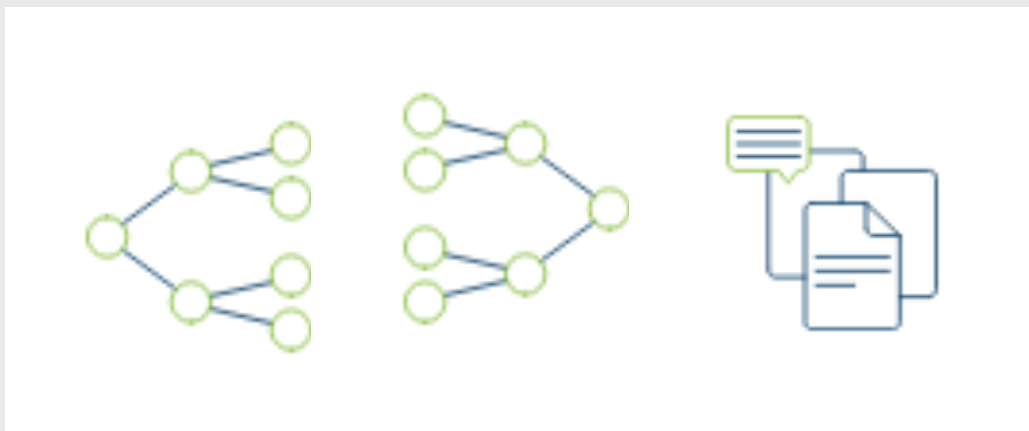

The 2010 Flash Crash is still not fully understood

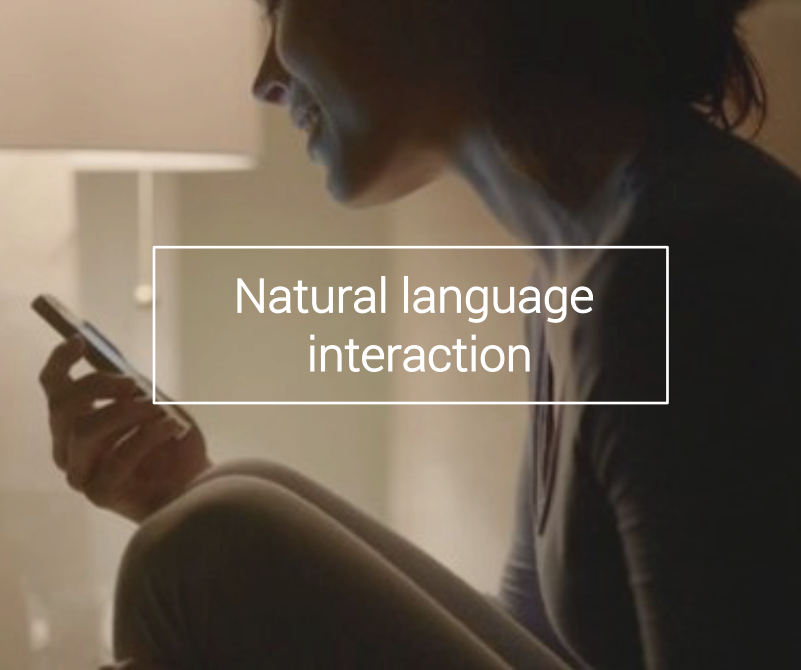

Learning approach:
Recognizing patterns

Two dual, complementary approaches

Deterministic approach:
Fully traceable logic

Natural language
interaction

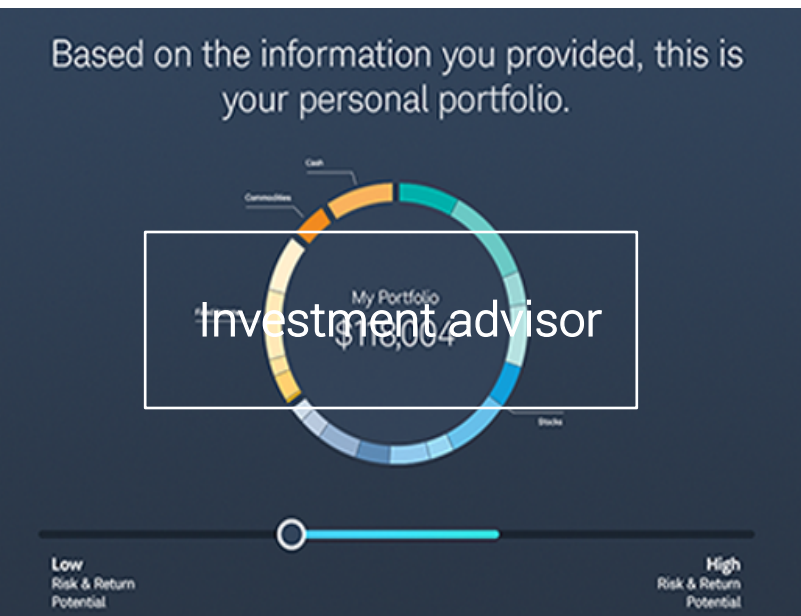

Virtual assistant

Risk & Fraud detection

Use cases

Commercial
underwriting

Commercial loan
origination

WE LIVE IN A DIFFERENT ERA
